

## Product Care Guide Kitchen Sinks

When cleaning the sink, please only use a soft cotton cloth, brush, or sponge. Using an abrasive material may cause damage to the sink.

Make sure to not keep any food in the sink as this may cause color stains to appear. Always rinse off the sink after using it.

Daily maintenance of the sink will ensure a lifetime of use! When maintaining the sink daily, simple soapy water and mild dish detergent are acceptable to clean dirt and stains. Make sure to rinse thoroughly.

FUID

 Using the provided kitchen sink grid will ensure that any pots or pans do not damage or leave marks on the bottom of the sink.

Regularly wash the grid to make sure that no buildup of food is left.

- If marks do appear on the bottom of the sink, rest assured that they are most likely not scratches but simple marks from pots or pans that can be wiped away.
- After you are done rinsing off dishes, make sure to wipe away any water in the sink to avoid water spots. Please use a soft cloth to dry the sink.

Avoid steel or metal cleaning pads as their abrasive surface can damage the interior of the sink.

Avoid placing hot cookware directly into the sink. Allow for the hot cookware to cool off prior to placing into the sink.

The surface of the sink has good resistance properties to acids, but should not come into contact with alkalis or organic solvents, such as caustic soda, some multi-surface cleaners, bathroom cleaners, bleaches, harsh solvents, burning cigarettes, strong chemicals such as dry-cleaning fluids, paint strippers, acetone, citrus based chemicals, and nail/varnish remover.

Make sure to not keep any standing water in the sink. This could lead to mineral deposit forming around the bottom of the sink. To remove any mineral deposit, a soapy water solution would be best to remove the mineral deposit.

To clean the strainer, please remove the strainer basket and bowl. Clean both parts using a brush and a mild dish detergent or soapy water. Rinse the basket and bowl and wipe off with a soft cloth. Insert back into the strainer.
